

I am concerned about the Low Power FM (LPFM). I am afraid of losing my Radio station K-LOVE because of the (LPFM) that the FCC wants to introduce. I listen to K-LOVE because as a resident I feel it is a very positive radio station that leaves out all the garbage that the FCC allows other radio stations to broadcast. K-LOVE is a clean no foul mouth or rude DJs mouthing off over the airwaves. I believe that positive talking helps the community, when my kids would listening to other radio stations I wanted to hear what other DJs were saying over the air waves and I was not happy, they were downing other people, using bad language, trying to get people to do bad things just for money. I don't need my kids being raised that this is the way treat people. I feel that K-LOVE puts out a positive attitude for all ages to absorb. Isn't that

what we try to teach our children as we were raising them, why would I want to expose my children, family and friends to negative attitudes. I believe K-LOVE has and will always display a good positive attitude that we could all benefit from. Think about it, there are so many laws out there that protect people from getting hurt, Example: (The governor of California Arnold S. just signed a bill that if someone just says something that might threaten someone they could go to jail. Listen to K-LOVE. It supports family, friends all walks of life to treat them well as if they are your own family. we need radio stations like K-LOVE to encourage one another, and to be positive, treat people well. Since I have started to listen to K-LOVE I not only turned my life around for the better, But I became a supporter of them as well. I truly believe it changed my life for the better. And as a supporter I hope that my contribution will be able to help others as well. we need more stations like this on the air. If you want negativity, watch Maury, Or The Jerry Springer show. Or Limmy, There is enough Prone, filth, on the radio and T.V. stations.

Please leave this one alone. It may be the only radio station left that promotes good clean thoughts. There are enough obstacles in life we have to jump through and sometimes fail. At least I know every morning when I get up I can turn on my radio and not have to worry about offending anybody by what comes out of my speakers. I used to listen to ROCK 99 in Salt Lake City, and on my days off when I was home the DJs were getting pretty rank over the air, I had to turn my radio off so my daughter wouldn't hear the filth.

I am glad that I changed my life around, and found K-LOVE. What an inspiring and positive radio station.

PLEASE don't allow (LPFM) to ruin my radio station. It's the only thing left that's worth listening too.
